

Hvussu skjótt sodnast ein lús?

Aliráðstevnan 2017

Ása Johannesen

Fiskaaling

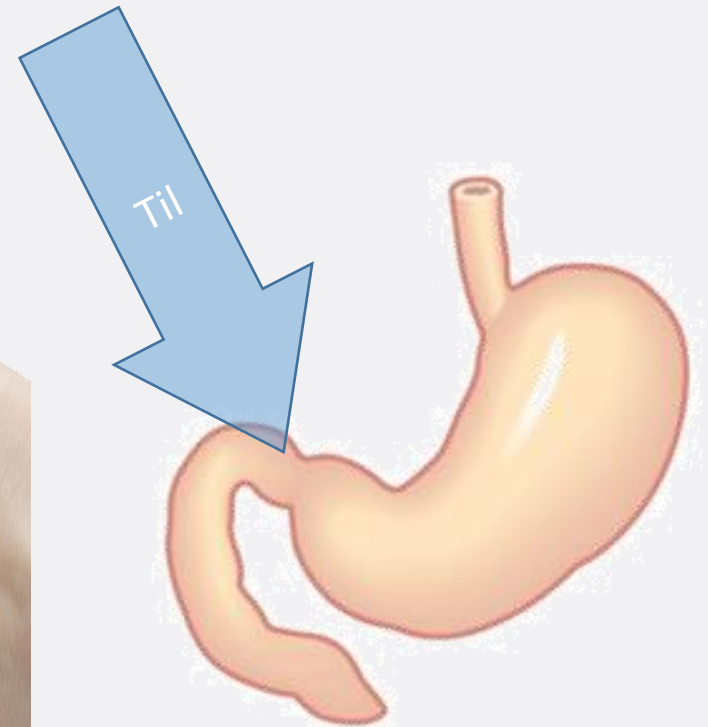

Rognkelsi eta lús

Nógva lús

Tey siga

Minst 3 tímar - Hægst 6 tímar

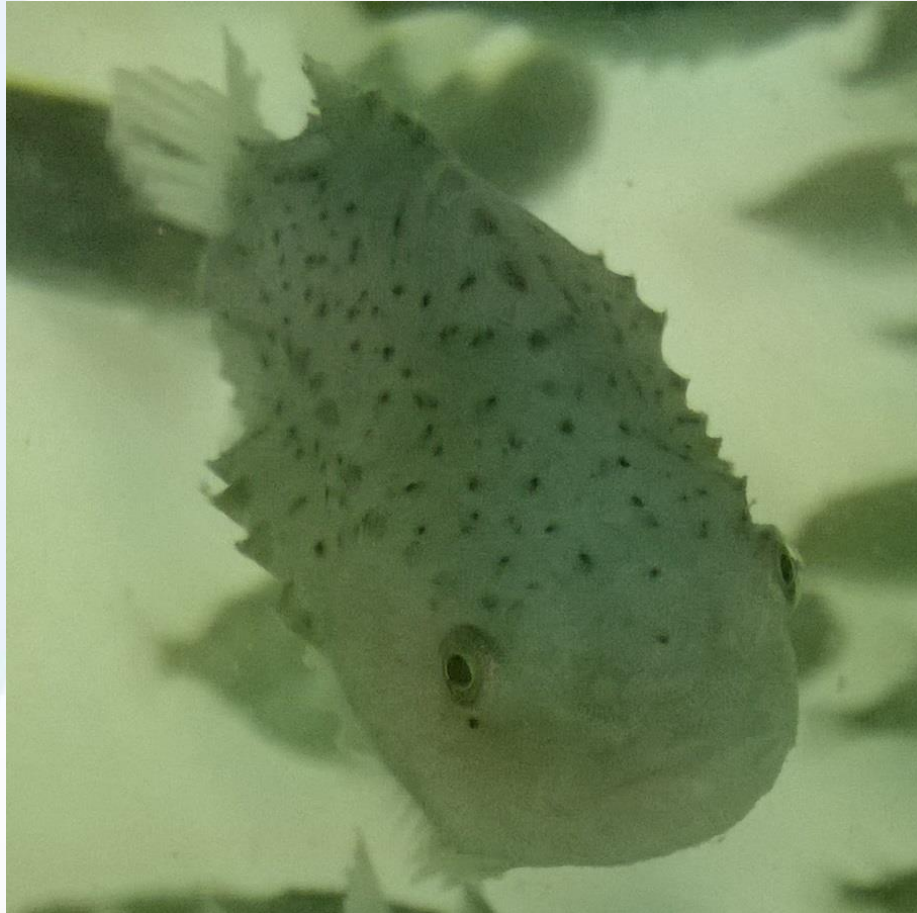

200 lýs uppá 3 tímar?

Tað er uml 67
lýs um tíman
ella 1600 lýs
um dagin

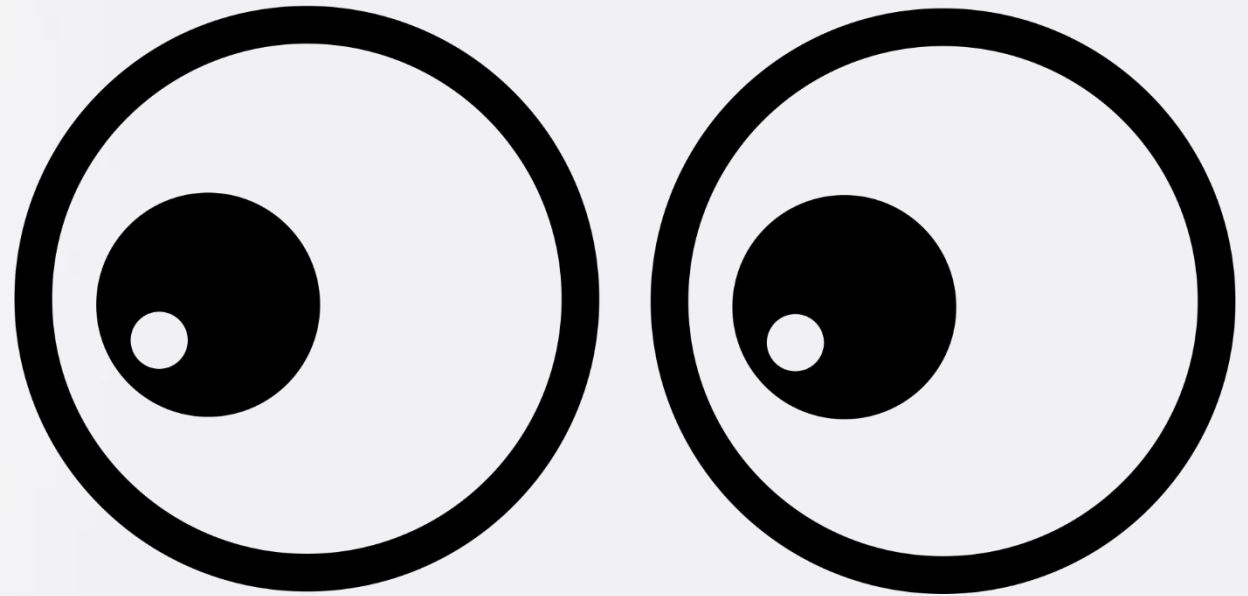

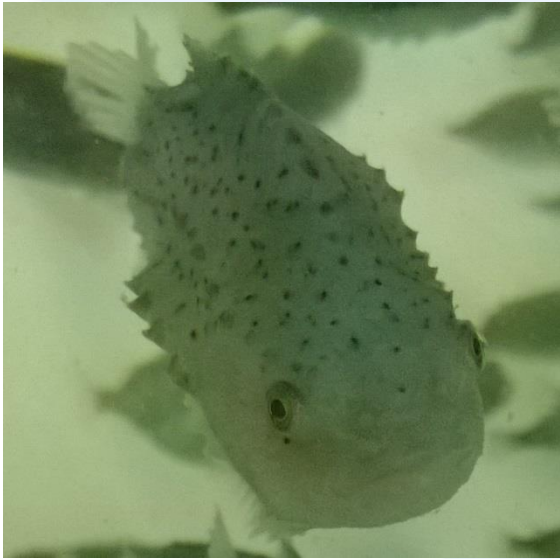

Hetta má kannast!

xiaomei23.deviantart.com

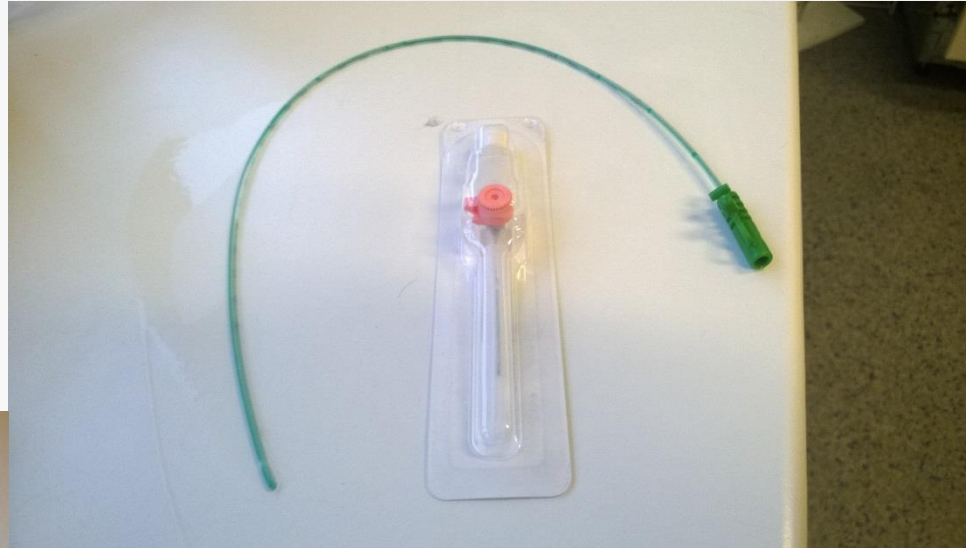

Geva rognkelsum lús at eta

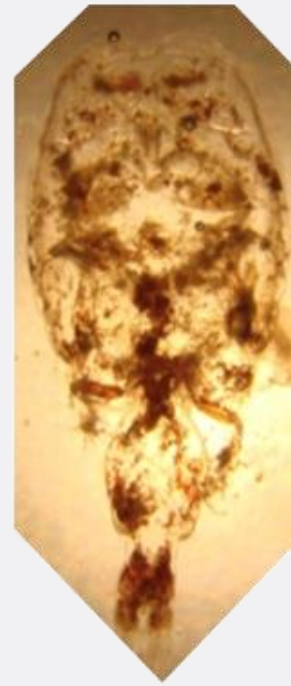

Koyra tey í akvarium at sodna

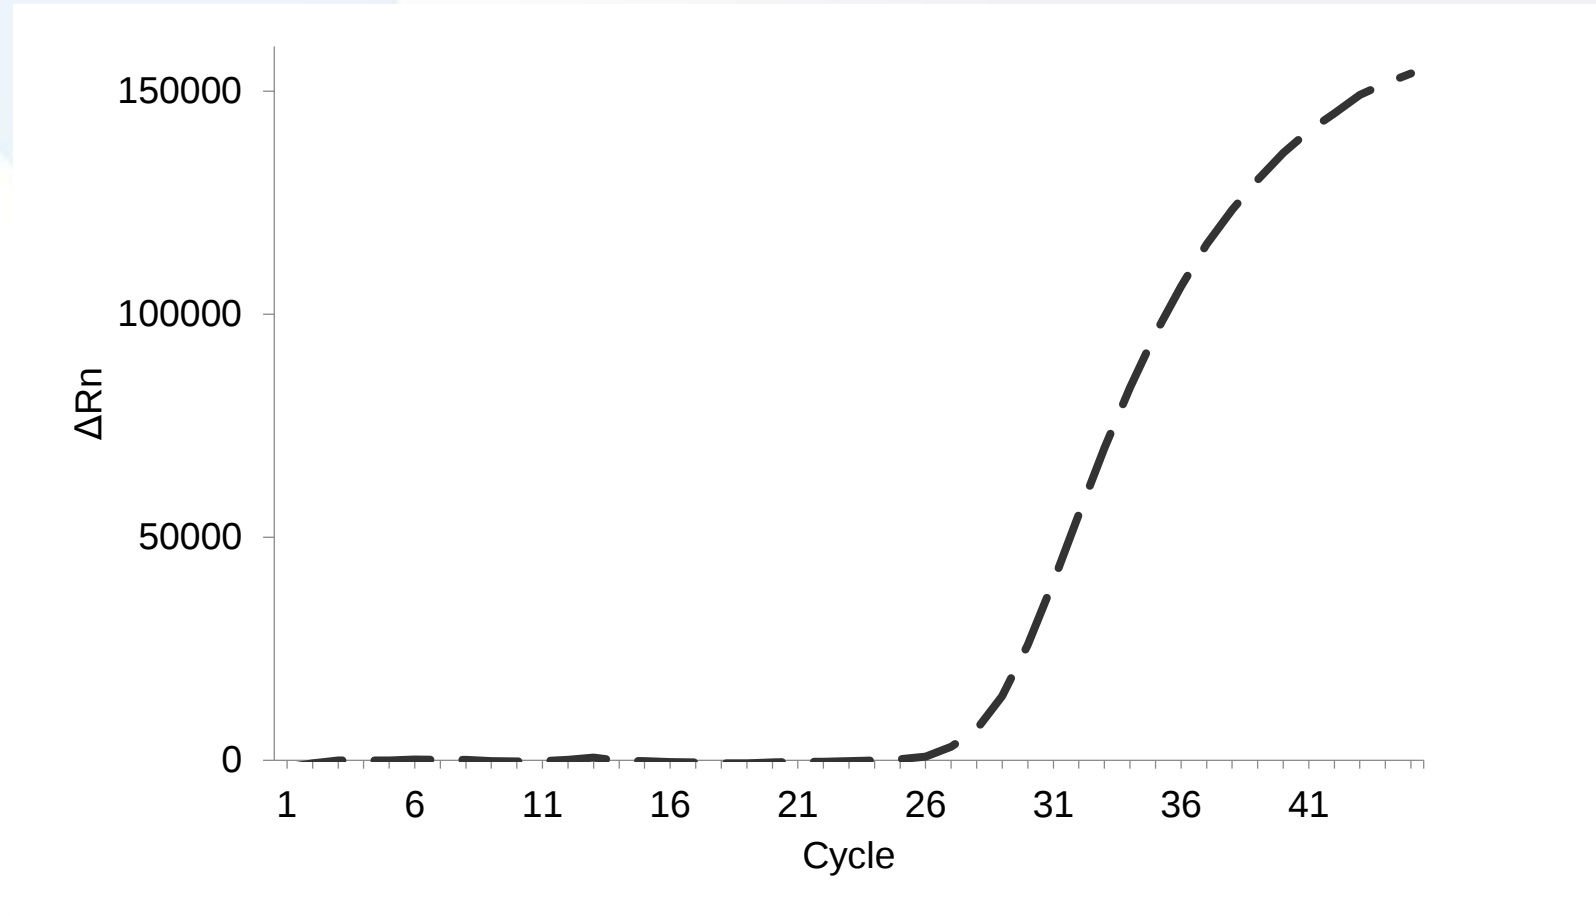

Taka sýni

Kanna í mikroskop

Kanna viđ PCR

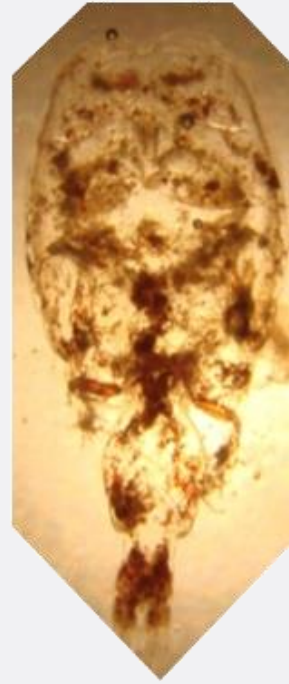

Sodningin gekk seint!

6

24

Ordiliga seint!

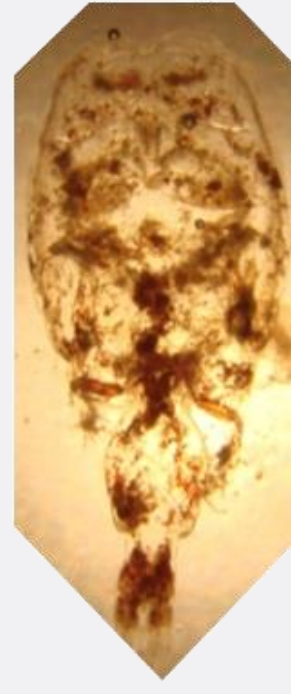

6

24

54

72

96

So hvussu leingi tók tað at eta lýsna?

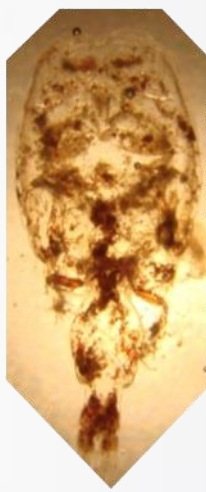

6

24

54

72

96

Kanska ikki 72-96 tímar

Undir øllum umstøðum 54 tímar!

Hvussu nógvar lýs eta rognkelsi so um dagin?

- $200 \text{ lýs} / 50 \text{ tímar} = 4 \text{ lýs um tíman}$

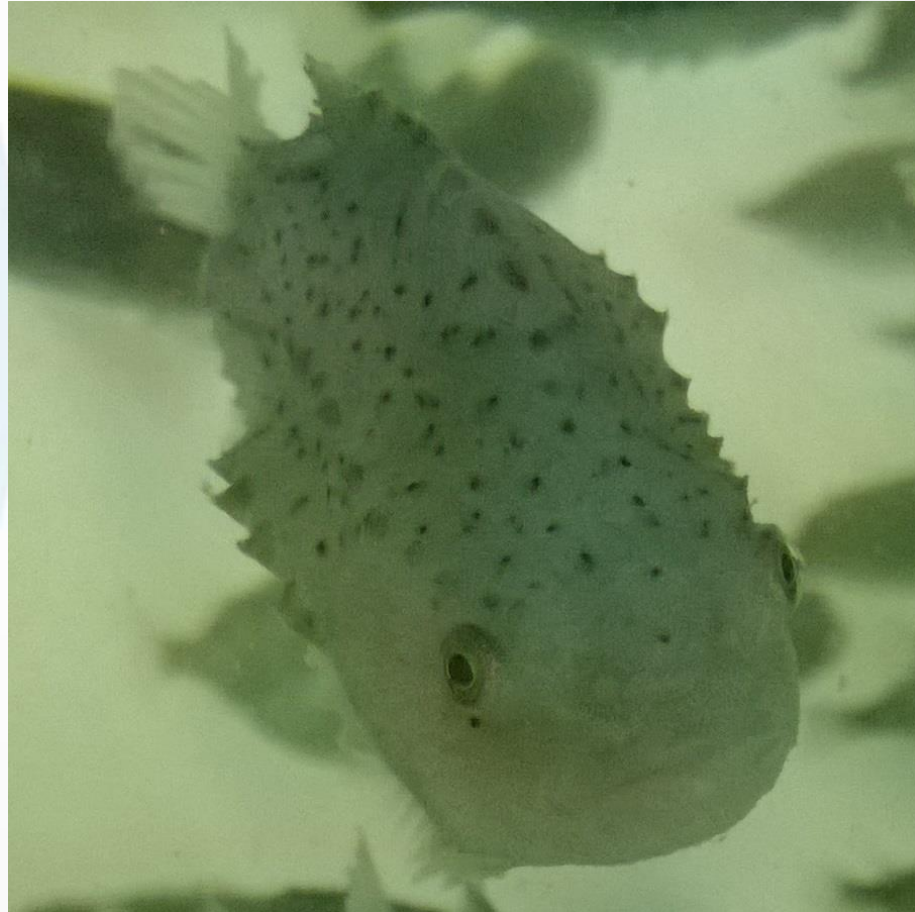

96 lýs um dagin

- Kanska...

Mugu vita meira

Í royndini vóru øll
rognkelsini somu
stødd

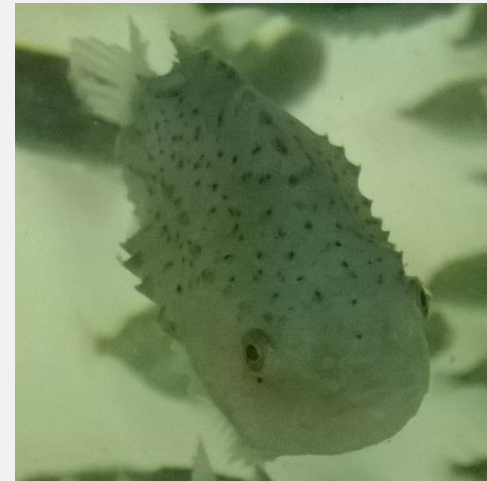

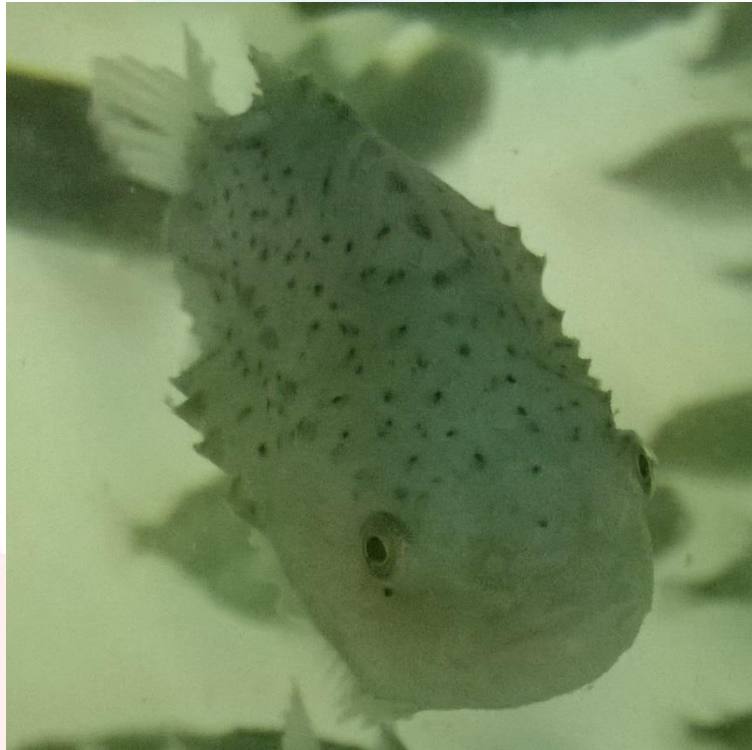

Hitin var tann
sami

Lýsnar vóru líka

Sodnaðu í
sama
umhvørvi

Ger stöddin mun?

Á lúsini ella á rognkelsinum?

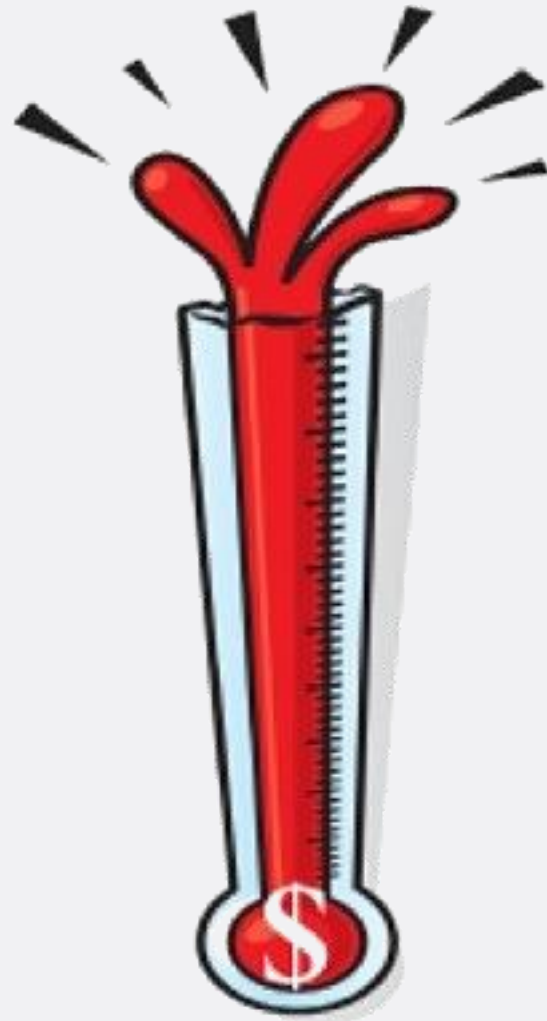

Aktivitetur?

Um blóð skal í
svimjimusklar, so
fer tað ikki í
sodningarlagið

seinni sodning?

Hiti?

Takk fyri!
